Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The subject matter of this application admits of illustration by a new drawing to facilitate understanding of the invention. Applicant is required to furnish a new drawing under 37 CFR 1.81(c). No new matter may be introduced in the required new drawing. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d), substantially as applied on 9/15/05.

The guide plate slots have not been depicted indicated with reference(s) numerals.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention, substantially as applied on 9/15/05.

The specification fails to teach(es) one skilled in the art precisely how an object(s) transfers from the first segment to the second.

Conclusion

4. Regarding the applicant's remarks at large, the examiner offers the following response.

The examiner sees the central issue as follows, referring to the second & third paragraphs of page 8 of the specification. The guide plate 48 was not originally depicted in the Figure(s). The slots 50 & 52 are indicated only at the far bottom of Figure(s) 5 at their straight portions. No attention is drawn to the transversely angled portions of the slots as being the member(s) that passively shifts the object(s) as the conveyor travels. The applicant merely states in the last two sentences of the second paragraph that angle to one vertical plane and then back again. There is no linkage established to the object(s) transfer. The examiner refers to the amendment(s) to the specification of 4/10/06, page 5 and it's accompanying drawing changes. This insertion, identifying sidewalls 50A & 50B of the slots is the exact part of the disclosure that was missing. These few changes on pages 5 & 6 would enable the disclosure were it not for that fact that the examiner considers it new matter.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph A. Dillon, Jr. whose telephone number is (571)272-69136913. The examiner can normally be reached on 8-5:30, every other Friday off.
